Washington, DC 20554

RE: Docket PR 92-235

Dear Ms. Searcy:

This letter is in protest to the Federal Communications Commission
PR 92-235.

Our sparsely populated area along with the rugged terrain of this area
would simply not lend itself to range reduction as we understand will
take place with the replacement of Part 90 by Part 88.

The lack of operability between new and old systems or between the
new Part 88 VHF 5 kHz equipment and federal 6.25 kHz equipment would
mean, if one agency changes and another agency does not change, there
could be no communication between the two.

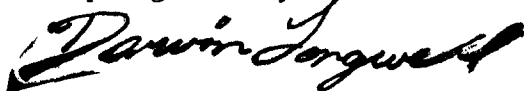

The extreme cost to convert to new Part 88 equipment, amounting to
millions of dollars, would be out of the question for Hot Springs County.

If the densely populated areas require more channels, please limit your
changes to those areas.

To impose those changes on an area such as Wyoming is absurd.

Yours truly,

Hot Springs County Board of Commissioners

Darvin Longwell
Chairman

DL/jaa
